● Status

Name	
Health	This is the health bar. It decreases when receiving hits and being knocked down after it reaches 0 takes you out of the match.
Punch	Punching power. The higher this value, the easier to put opponents on their knees.
Kick	Kicking power. Like punches, a high power makes it easier to put opponents on their knees.
Weapon	Attack power when striking with an item. This is the sum of your power and the item's power.
Throw	Attack power when throwing an item. This value is also taken into account when throwing an opponent onto another.
Agility	Helps you move around and also affects your jumps. Also affects attacks involving dashes.
Strength	Reduces damage taken. The higher this is, the higher your chances to survive fights.
Recovery	Indicates how easy it is getting up after being taken down.
AI Type	CPU's moves type.
Anger Type	Characters with short anger times or that hardly get angry have a considerable boost while angry. While the angry boost is a good way to get damage in, there are three levels of anger time and anger build-ups.
